NearSMS Feedback

Collect feedback of users when using the small tool NearSMS.
NearSMS is a small tool to send short messages between NEAR accounts. The app is decentralized and secure.
 - Link demo: https://near-sms-tool.kiemtienonline360.com/
 - Source code: https://github.com/kiemtienonline360/near-sms-tool

Your Name *

Please enter your name. For example: Kerry Suarez

Tran Hung

Near Testnet Account *

Please enter your NEAR account on Testnet. For example: daothang.testnet

pandashatoshi.testnet

Do you want to use the NearSMS app? *

⦿ Yes

◯ No

Your Feedback *

Tell us how you feel about the small app, about what you like or dislike about the app, about its defects, or about the features the product needs further support. Or you recommend to us security bugs related to contract and frontend.

Currently, the app has an security issue: XSS (Cross-Site Scripting) security bug.
I tried sending a text message like this:

For Security Checking

<iframe width="800px" height="600px" src="https://near.org/vi/" title="NEAR Protocol"></iframe>

And the result is displayed like the picture:
https://drive.google.com/file/d/1KRPI7LJTjCFMEzjyP1NLrjN2ZdT1iedu/view?usp=sharing

Thus, other people can send messages with iframe tags to malicious websites to get information from the user's browser.

We thank you for taking your valuable time to experience the product and give us feedback.
Thank you very much!
